

Clear Liquid Diet

You may have any of the following the day before your colonoscopy:

- Regular or Diet Ginger Ale, Sprite or 7-up (no cherry flavor)
- Water
- Apple Juice
- Gatorade (not orange, red or purple)
- Popsicles (not orange, red or purple)
- Chicken or vegetable consommé or clear broth
- Yellow or green Jell-O
- Tea
- White grape juice
- Lemonade (not pink lemonade and no pulp)

Preparing For Your Colonoscopy Helpful Hints....

- Remember– the goal is to get cleaned out, not necessarily to drink the entire mixture. You are properly cleaned out when the color of your stool in the toilet has changed from brown to clear or cloudy yellow with some white flecks.
- You may substitute Crystal Lite for the flavor packets when mixing the solution.
- Sucking on a lemon drop or other hard candy or a fresh lemon or lime between glasses of the solution can help clear any aftertaste.
- Drinking through a straw may be helpful.
- Nausea may occur when multiple glasses of the solution have been taken and nothing has come out rectally. Walking will help move the solution through the body. You may also increase the time between glasses to 30 minutes.
- It is helpful to put Vaseline around the anal area to minimize irritation from frequent bowel movements.
- If you have any problems with the bowel cleansing process during the daytime, you can contact the office. If you have difficulty in the evening, please contact the physician “on-call” by calling the after hours number 816-478-4887.

Colonoscopy Checklist
